

# Case Study

# Geofabrics

Project: Horizon Hills, Malaysia  
 Designer: Ross Watson Construction  
 Supervisor: Mark Ecott  
 Shaper: Gary Cox

## BunkerMat®

The bunker style in which the designer, Ross Watson, has planned is dramatic thus **BunkerMat®** is being installed at Horizon Hills, Malaysia, to prevent washout of bunker sand and to stop the chance of contamination from the clay subsoil.

With the inclusion of its dramatic bunker design, Horizon hills will be a world class course when completed.

*"I have found the BunkerMat® to be of extreme quality and worth its weight in gold. We had 4 inches of rain on Tuesday afternoon and not one wash-out".*

**Mark Ecott – Construction Supervisor**
