

Case Study

Geofabrics

Project: Riffa View
 Client: Braemar Golf / Nass Corporation
 Designer: European Golf Design/ Colin Montgomerie
 Location: Bahrain

Megaflo®

Braemar Golf Developments in conjunction with the Nass Corporation are the contractors for the new Colin Montgomerie designed Royal Golf Club at Riffa Views, Bahrain.

Riffa Views has dramatic natural Wadi landforms which are being retained as an intrinsic feature.

There will be deep Scottish-style links bunkers. Some parts of the course run through the historic Al Hunaniyah Wadi a dry riverbed valley.

Megaflo® was the preferred drainage product in all greens and tee's throughout the course.

Due to the deep sand sub-soil, keeping trenches from collapsing using the traditional trenching method would have proven either very difficult or almost impossible.

Megaflo® eliminates the need for trenching and thus speeds up time spent installing golf course drainage.
